OVERALL MIGRATION INTO WATER FOOD SIMULANT**DM 21/03/1973 GU n° 104 20/04/1973 All IV sez 1 DM 26/04/1993 GU n° 162 13/07/1993 All III DM22/07/1998 GU 228 30/09/1998**

In order to determine the category for the authorised use of glass articles, 2 containers of 779 ml capacity were carefully washed, filled with 701 ml of high purity water and kept in an autoclave at the temperature of 120 °C for 30 minutes.

The extract solution was transferred into a platinum dish, evaporated to dryness and the residue was weighed, obtaining the following result:

Total migration = 16.3 mg/kg

Reference values

Category A: articles to be used under any condition of food contact, including sterilization. ≤ 50 mg/kg

--- END OF THE TEST REPORT ---

The results stated in this test report refer exclusively to the examined sample, as received, unless otherwise specified. The laboratory is not responsible for that information contained in said report that have been provided by the customer. This test report must not be reproduced in part without our written authorization.
